About Us

Founded in 1989, Booth Welsh now employs around engineers and consultants worldwide.

At the core, Booth Welsh develops solutions through multi-discipline engineering, supporting clients to optimise their operations. Using their knowledge of automation, digitalisation, and Industry 4.0, Booth Welsh can embed intelligent technologies in their solutions, adding value to clients.

Relationships

We have built trusted and enduring partnerships in many different industries working with global companies that aspire for the best.

Our knowledge of engineering is second to none and we are proud to have built long standing relationships with a growing list of major international companies within the Oil and Gas, Nuclear Power, Chemicals & Petrochemicals, Pharmaceuticals & Life Sciences, Renewable Energy, Utilities, Food & Beverage and Defence industries.

Our Mission

Through collaboration, we engineer a better future

Our Goal

Engineer Value by Engagement, Collaboration & Innovation. Optimising processes by deploying technology & digitalisation to create unique differentiators for project execution and life cycle support.

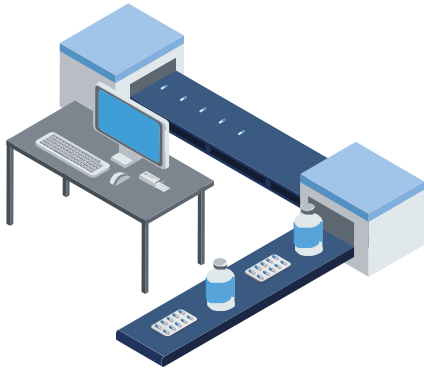

Our Values

Our shared and inclusive vision involves the entire workforce, empowering people to do better every day. We practice open and collaborative working with colleagues, clients and other stakeholders, leveraging key talent in-house to be leaders in thinking and practice. We are visionary and ambitious, promoting creative and innovative ways of working and challenging behaviours every day.

We understand your sector

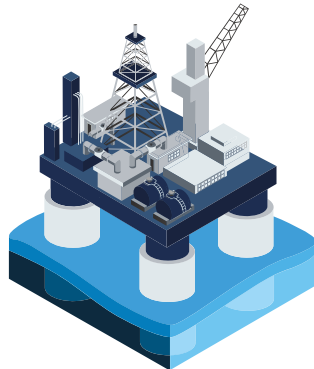

At Booth Welsh we understand your business.

We work with clients across a rich variety of sectors, designing and delivering state-of-the-art solutions and boosting efficiency and profitability.

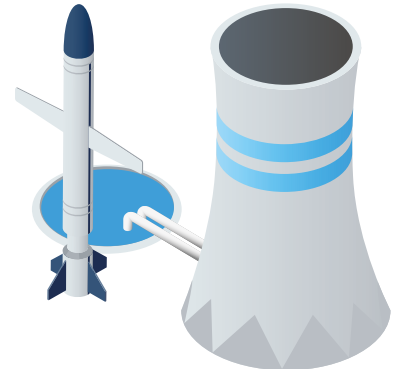

Life & Chemical Sciences

Assisting pharmaceutical companies to maximise efficiency through the use of technology.

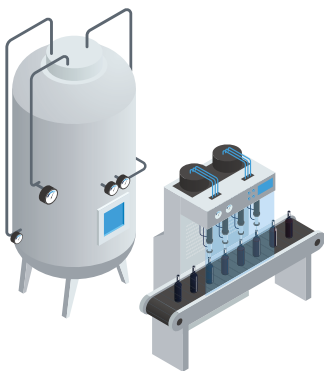

Oil & Gas

World-beating engineering solutions reducing costs in the Oil and Gas industry.

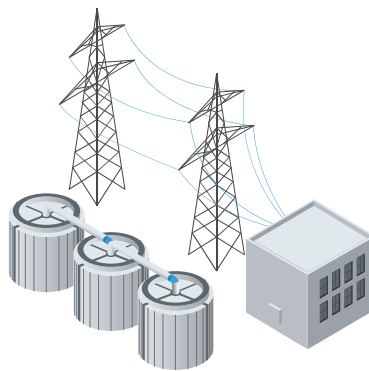

Nuclear & Defence

Over 20 years' experience working in highly regulated industries including Nuclear power & Defence

Food & Beverage

Using our wide expertise to meet the requirements and demand in a booming industry.

Utilities

We provide an independent service to our clients engineering the optimum solution every time.

Other Sectors

We have great experience in other sectors including Renewables and Manufacturing.

environment 4.0
by BOOTH WELSH and iTech

Using emerging digital technologies, we can align your business and environmental goals to achieve measurable results in efficiency, performance, mitigation, and waste reduction, while also delivering a positive impact on profitability.

We have coined the phrase 'Environment 4.0' on the back of the Industry 4.0 revolution, which looks at how we can embrace digital transformation, not only to provide business benefits but to reduce their carbon footprint and help the environment on their journey to net zero,

Booth Welsh has pledged to be Net Zero by 2045 and we are adapting our services to help our clients and supply chain achieve the same goal.

Quality, Environmental, Health & Safety

Booth Welsh have a dedication to keeping our people safe. Our commitment to incredibly high safety standards is the reason we have a record 18 years without a Lost Time Incident (LTI) and has been acknowledged in our award of ISO accreditations: ISO9001 Quality Management Systems, ISO14001 Environmental Management, ISO/IEC27001 Information Security Management and ISO45001 Occupational Health and Safety Management.

We continuously cultivate a robust safety culture that encourages a focus on commitment, teamwork, and accountability for our collective safety performance, empowering our people to always do the right thing in looking out for the safety of themselves and each other. This strong safety culture is embedded into everything we do, both in our own working environment and our clients.

Engineering Services

Consultancy & Specialist Services

Booth Welsh has a specialist engineering services consultancy, with experience across many different industry sectors.

Multi-Discipline Engineering

We provide Multi-Discipline Engineering solutions, including Process Engineering, Electrical & Instrumentation, Mechanical, Piping, Structural & Civil.

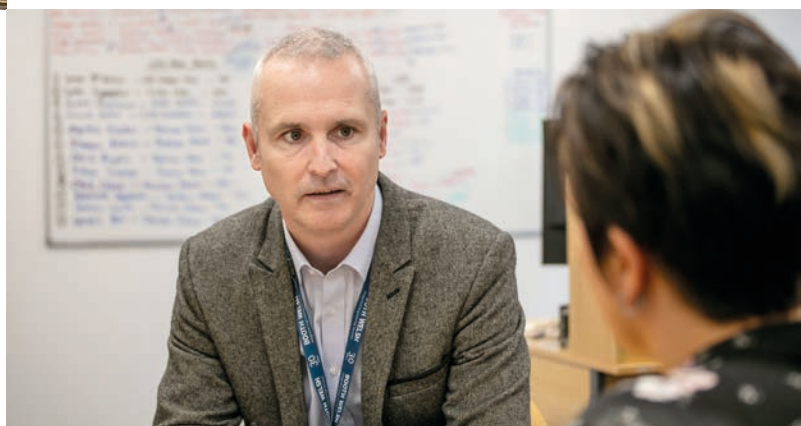

EPC and EPCM Services

From small self-delivered EPC projects to large complex projects, we deliver a range of comprehensive solutions.

Technical Recruitment

We offer a dedicated technical recruitment resource providing services to clients across a spectrum of industries.

Technology & Digitalisation

Booth Welsh embeds digital technology throughout the complete lifecycle of our client's projects and collaborations.

Process Control Systems

Our team's knowledge covers a very wide range of mainstream Distributed Control System products and technologies.

Control Panel Design & Build

Booth Welsh are specialist electrical and instrument control panel designers and manufacturers.

Field Installation

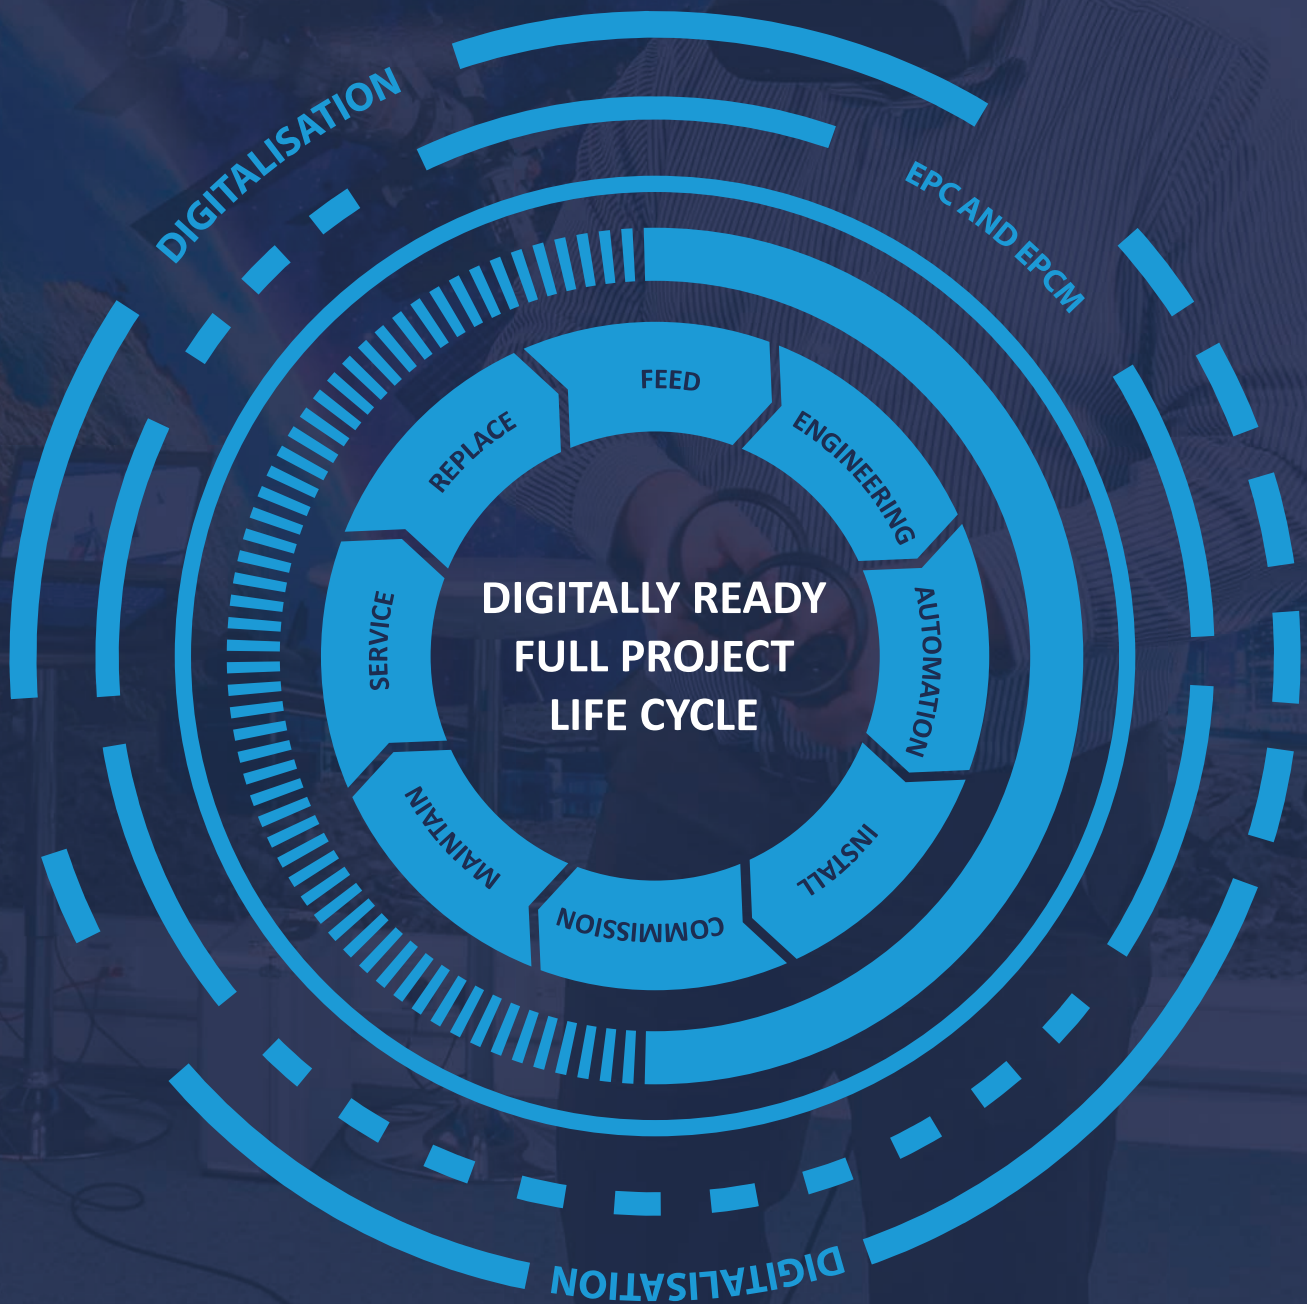

We employ a multi-discipline team consisting of professional, skilled and experienced people who have a relentless focus on quality and safety, continually ensuring excellence for our clients.

Our Differentiator

Our Integrated Engineering Service allows for fewer interfaces resulting in improved cost and project efficiencies.

This unique capability allows us to consistently provide a flexible and responsive service for our clients, ensuring projects are delivered on time and within budget. Our full range of engineering services can combine to create effective solutions to ensure legislative compliance to meet the demands of today's dynamic market.

Through collaboration, we engineer a better future

Why Booth Welsh?

We are a proud Ayrshire business, with project experience that spans the globe. From FEED studies to full EPCM capabilities, we have the experience and expertise to provide bespoke solutions that meet our clients' needs, completing projects to the highest standard.

Future Focused Business:

We combine our expertise in multi-discipline engineering with the latest technology to provide innovative solutions to optimise and future-proof our clients' operations.

Outstanding Commitment to Safety:

With 18 years without a lost time incident, we have an unwavering dedication to safety sets us apart from the competition.

Planet Positive Business:

We actively strive to be thought leaders in sustainable practices, utilising innovative technologies and techniques to minimise our own, and our clients' environmental footprint.
